About Me

Results-driven MCA student with project-based experience in manual testing, automation testing, API testing, and mobile application testing. Skilled in designing and executing test cases, validating end-to-end workflows, identifying software defects, and preparing structured bug reports.

Hands-on experience with Selenium WebDriver, Katalon Studio, Appium, Postman, and Mantis Bug Tracker. Familiar with SDLC, STLC, functional testing, regression testing, integration testing, and cross-browser testing.

Knowledge of Java, Python, PHP, HTML, CSS, and MySQL enables effective root cause analysis and collaboration with development teams. Seeking an Automation QA Engineer opportunity to contribute to reliable, secure, and high-quality software delivery.

Education

Ganpat University	2024 – 2026
<i>Master of Computer Applications</i>	<i>A.M. Patel Institute of Computer Studies, Kherva — CGPA: 8.60</i>
KSV University	2021 – 2024
<i>Bachelor of Computer Applications</i>	<i>Bholabhai Patel College of Computer Studies, Gandhinagar — CPI: 9.24</i>
N.K. Solanki School of Commerce, Gandhinagar	2020 – 2021
<i>HSC – Commerce</i>	<i>Percentage: 86.14%</i>

Skills

Testing Skills: Manual Testing, Automation Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, API Testing, Mobile App Testing, Cross-Browser Testing

Testing Tools: Selenium WebDriver, Katalon Studio, Appium, Postman, Mantis Bug Tracker

QA Methodologies: SDLC, STLC, Agile, Test Planning, Requirement Analysis, Test Scenario Design, Test Case Writing, Test Execution, Bug Reporting, Defect Tracking, Defect Verification

Programming Skills: Java, Python, PHP

Web Technologies: HTML, CSS

Database: MySQL

Projects

Online E-Book Store Management System – QA & Testing

- Developed and tested a web-based e-book store application using PHP, HTML, CSS, and MySQL.
- Designed and executed functional and regression test cases for user login, book browsing, downloads, ratings, payment flow, and book preview restrictions.
- Tested user authentication, session management, input validation, and access-control workflows using positive, negative, and boundary test scenarios.
- Identified, documented, reported, tracked, and retested software defects through structured bug reports containing reproduction steps, expected results, and actual results.

Online Home Service Booking System – QA & Testing

- Developed and tested a web-based home service booking application using PHP, HTML, CSS, and MySQL.
- Performed end-to-end testing of user registration, service selection, date and time scheduling, booking confirmation, and online payment workflows.
- Conducted functional, integration, regression, input validation, and cross-browser testing across different user scenarios.
- Identified, reported, tracked, and verified software defects to improve application reliability, usability, and overall user experience.

Certification Courses

- **Software Testing Fundamentals** – Infosys Springboard (*SDLC, STLC, test planning, test case design, and defect management*)
- **Appium Mobile Automation – Android, iOS, Frameworks and CI/CD** – Udemy (*Mobile application automation testing and framework concepts*)
- **Test Automation: Automated Software Testing** – Infosys Springboard (*Automation concepts, testing frameworks, and automated test execution*)
- **Software Engineering Fundamentals: Software Development and Testing** – Infosys Springboard

Key Strengths

- Strong analytical and bug-detection mindset with close attention to software quality and detail
- Ability to design structured test cases and manage defects from identification through verification
- Quick learner with practical exposure to manual, automation, mobile, and API testing tools
- Developer knowledge enables deeper technical understanding and effective root cause analysis
- Strong documentation and communication skills for collaborative development and testing environments
